*Alumni Society*

**TORONTO, CANADA**

## The Saints e-Mail system, based on Gmail and the st-stanislaus-gy.com domain

Way back in the early days, alumni Godfrey Whyte and John Sparrock came upon the Google feature which allowed members of an organization to use that organization's domain name for mostly "internal" email communications.

Thus individual emails can be set up as "**my-username**@st-stanislaus-gy.com".

Over the years, this has evolved into [Google Workspace for Nonprofits](#), providing more collaborative capabilities.
